

ch12 - Associative Arrays

Objectives

- Learn how associative arrays describe data.
- Use foreach statements to iterate through an array.
- Select elements from an associative array.

Set up

- Copy ch12 from your coursework folder into your web182 folder.
- Start up XAMPP/MAMPP
- Start the Apache webserver

Assignment

Read chapter 12 about associative arrays. * Complete the following.

- All of the fixit exercises.
 - All of the modify exercises.
 - These coding exercises from the end of the chapter
1. My info (don't use your real address)
 2. Employees
 3. Travel costs
 4. City trips
 5. Sessions - Use this content for the sessions exercise. You can modify the **raffle** or **math** examples from the book. You can run the examples in your browser. The files are located in **samples/sessions**

CSS

You can choose to replace the author's styles with those of your own or leave them as is.

Submit your work

- Make sure you have completed the Review Questions
- Zip your **ch11** folder.
- Rename the folder to **yourLastName-ch11** and submit it in Moodle.
